

ACID RESISTANT · BOTTLE GREEN

65/35 PREMIUM ACID JACKET & TROUSERS

Polycotton
65/35

DESCRIPTION

This bottle green jacket and trouser suit is a strong, lightweight and durable work garment designed to protect against acid splashes and mechanical hazards such as abrasion. The fabric features a fluorocarbon finish treatment that resists acid corrosion and prevents wetting by acids or moisture in the event of accidental chemical spillage, giving users essential protection in the workplace.

JACKET FEATURES

- Collared jacket design for comfort and protection
- Concealed chunky YKK zip closure
- 2 open laid-on waist pockets and 2 breast pockets with V-flap and concealed metal press stud closure
- Pen division for added functionality
- Triple needle top-stitched seams with bartacked stress points

TROUSERS FEATURES

- Concealed chunky YKK zip with metal button closure at waist
- 2 front swing pockets and 1 rear open mitred pocket
- Fully triple stitched seams
- Inner elasticated waist with 5 belt loops

SUITABLE INDUSTRIES

- LOGISTICS
- WAREHOUSING
