Acid-resistant garments require special care: if exposed to acid, wash and neutralise as soon as possible to prevent fabric damage. The Fluorocarbon finish is permanent and remains effective after 50 washes.

CARE & MAINTENANCE

- Home cleaning or commercial laundering, adhering to recommended conditions and settings
- Avoid Hypochlorite bleach or detergents containing Hypochlorite bleach
- Iron on low heat
- Pre-treat greasy stains with a light cleaning solvent and wash in warm water
- Do not tumble dry; rinse thoroughly to remove wetting agents
- Dry clean if home cleaning does not remove contaminants
